JOIN US IN THE FIGHT FOR HEALTHY COMMUNITIES!!!!

Do you or your loved ones have diabetes? South Carolina has one of the highest rates of diabetes. This chronic disease affects African-Americans at an even higher rate! But the good news is adult onset (Type II) diabetes can be controlled or even cured with the right combination of diet, exercise and medication.

Join us Saturday, October 29th at the Riverfront Park on the Old Naval Base, North Charleston. Lets stop diabetes one step at a time!
